

S. KADER SAFEER AHAMMED

+91-6383699523 — kadersafeerahammed2006@gmail.com
linkedin.com/in/kader-safeer-ahammed — Tirunelveli, Tamil Nadu

Professional Summary

Aspiring Data Analyst specializing in SQL, Oracle APEX, and Python with hands-on experience in building end-to-end analytics dashboards. Skilled in data modeling, KPI design, and interactive visualization, with the ability to transform raw datasets into actionable insights for decision-making.

Technical Skills

Analytics: Oracle APEX, Power BI, KPI Dashboards, Data Visualization

Data: SQL (JOIN, GROUP BY, CASE, Subqueries), Aggregations, Relational DB Design

Programming: Python (Pandas, NumPy – Data Cleaning, EDA)

Tools: Oracle APEX, Excel, Git, VS Code

Data Analytics Projects

Student Performance Analytics Dashboard — Oracle APEX, SQL

- Designed a 3-table normalized relational schema (STUDENTS, SUBJECTS, MARKS) ensuring referential integrity
- Developed multi-table SQL queries using JOIN, GROUP BY, CASE expressions to compute total, average, and performance status
- Built interactive reports enabling sorting, filtering, and structured data exploration for performance evaluation
- Improved data accessibility by converting raw tables into meaningful analytical reports for decision-making

Data Visualization Dashboard — APEX Charts

- Designed dynamic dashboards using Bar, Pie, and Line charts to visualize subject-wise averages and performance distribution
- Implemented real-time filters using bind variables (P1_SUBJECT, P1_STUDENT) with dynamic actions for instant updates
- Analyzed trends and patterns in student performance, improving interpretability through visual storytelling
- Enabled multi-dimensional analysis by combining tabular reports with graphical insights

Advanced KPI Dashboard & Analytics System — Oracle APEX

- Built KPI dashboard tracking Average, Highest, and Lowest marks using SQL aggregation functions
- Identified low-performing students (marks < 50) using conditional formatting with highlighted indicators
- Developed interactive reports with export functionality (Excel, PDF, CSV) improving reporting efficiency
- Integrated dynamic filters (subject, academic term) enabling real-time data slicing and drill-down analysis

Experience

Data Analytics Learning Track

2025 – Present

Manonmaniam Sundaranar University

- Completed a structured analytics program covering SQL, Oracle APEX, dashboard design, and data visualization
- Built multiple end-to-end analytics projects including dashboards, KPI systems, and performance reports
- Applied Python (Pandas, NumPy) for data cleaning, transformation, and exploratory data analysis (EDA)
- Delivered insights through dashboards combining SQL queries, charts, and interactive filters

Education

B.Sc Computer Science

2024 – Present

Manonmaniam Sundaranar University

Achievements

- Completed Oracle APEX Data Analytics Program – Naam Mudhalvan
- Developed multiple analytics dashboards with KPI metrics and real-time filtering capabilities
